

BYOD LAPTOP PROGRAM

New students enrolling in Years 8–12

Continuing students in Years 9–12

Current Year 7 students should be participating the School Supplied Laptop Program (SSLP)

The Bring Your Own Device (BOYD) Laptop Program operates so that all students can engage in positive learning opportunities that will improve outcomes and develop skills that will be beneficial to them throughout their lives.

To ensure consistency across devices and to guarantee they meet school requirements, we have developed an online portal where families can purchase competitively priced, suitable devices.

Click here - [Purchasing Portal](#)

The purpose of the portal is to streamline the purchasing and maintenance of devices, ensuring a cost-effective and convenient experience for families.

The benefits of purchasing your device through the portal are;

- We have done the research and simplified the process for you – we have selected devices across varying price brackets, which meet the recommended specifications required for student learning
- Our service provider LWT, provide onsite service for any warranty repairs, which results in less downtime for students with onsite repairs taking place at school where possible.

Our teachers use technology in the classroom in an educationally purposeful way to support high quality learning outcomes, enhance teaching practice, facilitate the creation of knowledge and enable differentiation of learning.

The device will be used to access:

- Assessment tasks, feedback, results and reporting
- Communication tools
- Industry standard software for creating, editing, designing, presenting and sharing
- Subject specific programs
- Printing, copying and scanning
